Summary

Software engineer with a Master's degree in Computer and Communication Engineering, combining frontend development expertise with AI specialization. Experienced in React, Next.js, JavaScript, TypeScript, and Unity/C# game development.

Completed intensive AI Development internship with SMUAI, building enterprise-grade AI agents with OpenAI integration and infrastructure automation. Certified in data science with proficiency in machine learning and computer vision.

Passionate about advancing skills in AI development, modern web technologies, and innovative application development.

Work Experience

AI Developer (Intern)	StartMeUp.AI Remote, Lebanon	6/2025 – 8/2025
- Developed 10 specialized AI agents using Next.js 15, TypeScript, and OpenAI GPT-4 integration. - Built infrastructure automation tools with Pulumi IaC, auto-scaling recommendations, and intelligent cost optimization. - Implemented RAG (Retrieval-Augmented Generation) systems with similarity matching and relevance scoring algorithms. - Achieved 80%+ test coverage using Jest, React Testing Library, and Playwright E2E testing frameworks. - Built project management automation tools with GitHub integration, sprint planning, and automated issue triage.		
ReactJS Developer	Hornet Strike Remote. Tyre, Lebanon	10/2024 – Present
- Developed and maintained user interfaces using React and JSX. - Created reusable components to enhance code efficiency and maintainability. - Collaborated with cross-functional teams to implement new features and improve existing functionalities. - Adhered to best practices and coding standards to ensure code quality and performance.		

Data Science

Zaka.ai
Remote, Lebanon

05/2024 – 09/2024

- An online certified program about data science and machine learning which consists of learning phase and project phase.
- Project phase(8 weeks): Computer vision project about predicting anomalies from dental x-ray images.
 - Clean dental data and excretes important images and their annotated files
 - Apply preprocessing and augmentation over the data
 - Train Yolov10, Faster RC-NN and DETR models on the dataset to get the best accuracy

Unity Game Developer

Freelance
Remote, Lebanon

10/2023 – 05/2024

- Developing Augmented Reality,Virtual Reality, and WebGL games
 - **Developed an engaging AR game for children** using Unity and C# to be played in dentist clinics on Android devices. Utilized the **Voidar SDK** for image recognition
 - **Developed a VR simulation for electric scooter training** using Unity and C#. This project allowed users to learn safe and responsible operation of electric scooters in a simulated environment

Unity Mobile Game Developer

Playholding
Beirut, Lebanon

09/2020 – 08/2023

- **Developed engaging and high-quality mobile games from concept to completion** using Unity and C#.
- Integrating **third-party** game development **plugins** (e.g., Obi Rope) to enhance gameplay mechanics.
- **Collaborated closely with the team** during the ideation phase to brainstorm game concepts, mechanics, and features.
- **Documented game design** using clear and concise technical specifications.
- **Independently developed game logic, mechanics, and functionalities** from scratch, ensuring a smooth and engaging player experience.
- **Optimized game performance** for mobile devices by implementing **CPU and GPU optimization techniques**, ensuring a smooth and responsive gameplay experience.
- **Manual testing procedures** to identify and resolve bugs before launch.
- Successfully launched games on the App Store and Google Play Store, adhering to platform guidelines.
- **Integrated and configured ad SDKs** to generate revenue for the game.
- **Performed A/B testing** to optimize game elements based on player behavior data, resulting in improved player engagement and retention.
- Successfully **launched** more than twenty mobile games.
- Aced **Game Design** concepts by creating game design documents (GDD), level design. Defining the rules, objectives, challenges, and rewards players. Balancing the difficulty and ensuring the gameplay is engaging and fun. Playtesting the game at various stages of development.

Front-end Developer Intern

Cloud Gate

06/2020-08/2020

- Developing **Front-End** cross platform applications using **React-Native** platform and **JavaScript**.
 - **Random Movie**: An app that displays highly-rated movies and allows users to discover a random movie to watch. github.com/ahmd-92/React-Native-RandomMovie
 - **Instagram main page Clone**: A replica of the main Instagram page layout and github.com/ahmd-92/Instagram-clone-dark-mode-mobile-application

Education

- **Master of science in Computer and Communication Engineering**, Lebanese International University. **2016–2018**
- **Bachelor of science in Computer and Communication Engineering**, Lebanese International University. **2011–2016**

Skills

- Languages: C#, Javascript, TypeScript, HTML, CSS
- Technologies: Unity engine, React-Native, React, NextJs
- Game Development: Scripting, Game Mechanics, Animation, Physics, AI, Game Design, Level Design, Third-Party Plugin Integration, WebGL, Augmented Reality, Virtual Reality
- Soft: Communication & Collaboration, Adaptability, Self-Motivation, Organization & Prioritization, Time Management, Problem-Solving
