

Ahmad Dehaini

AI Builder | Full-Stack & Frontend Engineer | Game Developer

Beirut, Lebanon | +96170527168 | ahmad.dehaini.8@gmail.com

Portfolio: ahmadehaini.netlify.app | LinkedIn: linkedin.com/in/ahmad-dehaini/ | GitHub: github.com/ahmd-92 | github.com/AhmaDehaini

SUMMARY

Software engineer building production web, mobile, and AI-powered applications. Experienced across full-stack commerce platforms, React/Next.js frontends, React Native mobile apps, Laravel APIs, AI agents, RAG systems, and automation workflows. Background in Unity game development with experience shipping mobile, AR, and VR applications. Strong focus on scalable architecture, API integration, testing, deployment, and practical product delivery.

WORK EXPERIENCE

ReactJS Developer | ScaryByte | 10/2024 - Present

Remote - Beirut, Lebanon

- Develop and maintain frontend web applications using React, JavaScript, and REST APIs.
- Build responsive, reusable UI components and integrate backend APIs for dynamic application data.
- Implement features across multiple web projects while improving user experience and platform performance.
- Contribute to an internal AI-powered web generation tool that automates website and project creation workflows.
- Collaborate with cross-functional teams and follow maintainable, scalable frontend development practices.

Full-Stack Engineer | PICK | Production Application

Lebanon - focused on shopping and services in the Tyre area

- Sole engineer for a production multi-vendor shopping and delivery platform spanning a Laravel REST API, React admin portal, and React Native customer/driver mobile app.
- Designed a scalable Laravel 12 backend covering vendors, branches, products, variants, carts, orders, promotions, reviews, delivery areas, authentication, and role-based access.
- Built a React 18 + TypeScript operations portal for order management, catalogue administration, vendors, customers, promotions, reporting, CMS content, and settings.
- Developed a 40+ screen Expo/React Native application with customer and delivery-driver modes, live order tracking, Mapbox maps and ETA, Firebase push notifications, and English/Arabic RTL support.
- Implemented secure authentication and platform integrations including Laravel Sanctum, Twilio SMS OTP, admin 2FA, Firebase Cloud Messaging, Firebase Realtime Database, and token refresh handling.
- Automated catalogue and maintenance workflows, including a 13,896-product import, and supported quality with PHPUnit, PHPStan/Larastan, Laravel Pint, Docker Compose, and deployment to a Linode VPS.
- Published the PICK mobile app on Google Play; iOS App Store submission is in progress. Google Play: play.google.com/store/apps/details?id=com.scarybyte.pick

AuraBrush-ai | Personal AI Project | 04/2026 - Present

Remote - Beirut, Lebanon

- Developed a full-stack AI-powered web application using React, TypeScript, Node.js, and Express.
- Integrated OpenAI APIs to generate AI coloring images with a credit-based generation system.
- Built image-generation and painting interfaces, authentication, user management, and credit-tracking logic.
- Managed end-to-end development from frontend UI through backend API integration and deployment.

AI Agent Builder (Intern) | StartMeUp.AI | 06/2025 - 08/2025

Remote - Lebanon

- Developed AI agent prototypes for automation, intelligent workflows, and AI-assisted productivity.
- Built applications using Next.js, TypeScript, and OpenAI APIs, turning product ideas into working prototypes.
- Implemented RAG systems with document retrieval, similarity matching, and contextual response generation.
- Designed prompt-engineering and tool-based agent workflows, including GitHub integrations and sprint-planning automation.
- Applied Jest, React Testing Library, and Playwright for application reliability and maintainability.

Data Science | Zaka.ai | 05/2024 - 09/2024

Remote - Lebanon

- Completed a certified data science and machine learning program with learning and project phases.
- Built a computer-vision project for anomaly prediction from dental X-ray images.
- Cleaned and prepared annotated image data, applied preprocessing and augmentation, and trained YOLOv10, Faster R-CNN, and DETR models.

Unity Game Developer | Freelance | 10/2023 - 05/2024

Remote - Lebanon

- Developed Augmented Reality, Virtual Reality, and WebGL applications using Unity and C#.
- Built an Android AR game for children in dental clinics using the Vuforia SDK for image recognition.
- Developed a VR electric-scooter training simulation focused on safe and responsible operation.

Unity Mobile Game Developer | Playholding | 09/2020 - 08/2023

Beirut, Lebanon

- Developed mobile games from concept to completion using Unity and C#, including gameplay systems, mechanics, and technical specifications.
- Integrated third-party plugins and ad SDKs, optimized CPU/GPU performance, and performed manual testing before launch.
- Collaborated on game concepts, mechanics, level design, balancing, playtesting, and Game Design Documents (GDDs).
- Used A/B testing and player-behavior data to improve engagement and retention.
- Successfully launched more than twenty mobile games on the App Store and Google Play Store.

Front-end Developer Intern | Cloud Gate | 06/2020 - 08/2020

Beirut, Lebanon

- Developed cross-platform frontend applications using React Native and JavaScript.
- Built a Random Movie discovery app and an Instagram main-page clone.

EDUCATION

- **Master of Science in Computer and Communication Engineering** - Lebanese International University, 2016-2018
- **Bachelor of Science in Computer and Communication Engineering** - Lebanese International University, 2011-2016

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, PHP, HTML, CSS

Frontend & Mobile: React, Next.js, React Native, Expo, Vite, TanStack Query, Zustand, Tailwind CSS, Radix/shadcn, react-hook-form, Zod

Backend & Data: Laravel 12, Node.js, Express, MySQL, REST APIs, Laravel Sanctum, Twilio

AI & Data: OpenAI APIs, AI agents, RAG, prompt engineering, computer vision

Cloud, DevOps & Testing: Docker, Docker Compose, nginx, Linode, Firebase FCM, Firebase Realtime Database, PHPUnit, PHPStan/Larastan, Pint, Jest, React Testing Library, Playwright

Game Development: Unity, game mechanics, animation, physics, AI, game design, level design, WebGL, Augmented Reality, Virtual Reality, third-party plugin integration

Professional: Communication, collaboration, adaptability, self-motivation, organization, prioritization, time management, problem-solving
